DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities:

In claim 1 line 12, "the same thickness" lacks antecedent basis. In line 14, "the same horizontal positions" lacks antecedent basis. In line 17, "the side edges" (second occurrence) lacks antecedent basis. In line 23, --the-- should be inserted prior to "contacts"; and "a" should be changed to ---the--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 7, 8, 11, 12 and 14-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Asakawa (US 6,135,809).

Asakawa discloses a card connector comprising: a pair of guide grooves (see following figure) formed on both sidewalls of a connector housing (2); and sidewalls (see following fig.) to define, below a space between the pair of guide grooves, and a base plate with a plurality of contact terminals arranged in the base plate to couple with contact of a bottom surface of a card.

Please note that recitations of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Regarding claim 2, Asakawa discloses the sidewalls formed at such locations that they can guide the side surfaces of a lower body portion of a first card (C).

Regarding claims 5 and 6 Asakawa discloses a housing top plate that forms upper walls of the guide grooves is formed with an opening / a recess (adjacent 12) having a width larger than a lower body portion of a first card, i.e. a least the same size as the separation between the side walls.

Regarding claims 7 and 8, please note that anyone of the terminals 20,50 can work as a braking piece.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 4, 9, 10 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Asakawa in view of Horie (US 6,231,360).

Asakawa discloses substantially the claimed invention except for the eject mechanism. Horie teaches a card connector having an ejector mechanism (11) to help withdraw a card from the socket. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to from the card connector of Kantner having an ejector mechanism, as taught by Horie, to help withdraw a card from the socket.

Regarding claim 4, Asakawa discloses the braking piece secure to a position which is far part of the guide groove.

Response to Arguments

Applicant's arguments with respect to claims 1 and 11 have been considered but are moot in view of the new grounds of rejection.

Conclusion

Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
